Occupational Health

Two Days Course

March 20-21, 2019 | 17:00 – 21:40

Organized By:

Venue:

SPEAKER

Mr. Heath Warburton, CAS

Head of Academic Operations in NAT

Mr. Heath Warburton is a certified Anti-Terrorism Specialist. He proudly served the US Navy as a member of the elite Submarine Service. He possesses over 14 years of experience in diverse fields of discipline to include; Tactical Medicine, Training, Logistics, personnel management, and project management, Electronics, Private and Maritime Security. He has developed these skills while working in over 20 countries on 3 continents. His experience as a submariner taught him the essential nature of cross-training, a philosophy he has brought to all aspects of his career. This has resulted in his focus on the development of training centers and programs designed to make students grow beyond the expectations of their industries as well as themselves.

OVERVIEW

The course is intended to introduce students to the basic core concepts of occupational health. Work-related health disorders and diseases that arise due to the interaction of employees with their working environment will be presented.

Modern approaches in occupational health aiming to improve Workers' health and well-being, as well as productivity will be discussed. Students will be introduced to major occupational health related diseases including those of the musculoskeletal system, the lungs, and the skin, as well as accidents. Overall, this course is intended to allow students to understand the interaction of the workplace and environment on the health and well-being of the workforce.
